**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 14-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tsuga.

Note: Figure 10.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-11, 13, 17-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuga in view of Romano.

Tsuga discloses in figures 1-10 a traveling lift that anticipates a device for treating a dislocated hip, substantially as claimed. However, Tsuga doesn't disclose the lift assembly including a ratchet or a screw jack. Romano teaches in figures 1-5 a lifting device that includes a lift assembly comprising a ratchet, a hydraulic device or a screw jaws. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that either of the lift assemblies as taught by Romano could be

used to lift a patient to support a dislocated hip. The method steps recited in claims 19-23 and 19-27 can be performed using the device disclosed by Tsuga and taught by Romano. It is old and well known to use a scale or a meter to determine the amount of force applied to a patient's leg.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seif-Naraghi, Lambert, Wang and Keller, each discloses a leg lifter.
